<u>Bug Report on Whatsapp Web.</u>

Title - Whatsapp gets stuck on Russian language.

**Description - ** After changing the language in the browser to Russian, Whatsapp gets stuck on the Russian language. They are the only app that seems to be affected by this, all the other tabs in the browser go back to the English language.

Security Level - High

Steps -

1. Open whatsapp web on Google Chrome browser.
2. Go to the toolbar and click on the three dots, after that click on the "settings" option.
3. Click on ""languages".
4. Add Russian as another language, click on "Display Google Chrome in this language" and click on "launch".
5. Go back to Whatsapp web and check that whatsapp is indeed in Russian.
6. Go back to "settings" and change it back to English.
7. Watch the browser and all the other tabs that are open change to English.
8. Go back to Whatsapp web.
9. See that Whatsapp web is still in Russian.

Expected results -

Whatsapp web returns to English after the change of the language.

Actual results -

Whatsapp web wont return to English or any other language after it is changed to Russian.

The same issue happens in Google Chrome, Mozilla Firefox and Microsoft Edge.
